City Clerk Alice Evenson,

Dear Friends in Pittsburg,

Although I live in Concord, I worked in Pittsburg for several years and came to really love the city and its citizens. And I also love the hills between that separate Concord and Pittsburg. I live along Bailey Road, just at the edge of CNWS, where I can see them every day. When I worked in Pittsburg, it was a joy to drive over Bailey every day and take in the beautiful surroundings. I am writing to help save those beautiful hills from an ill-considered development.

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want

housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

City Clerk Alice Evenson,

The open space on the ridges behind Pittsburg add so much to the beauty of our area.
Please keep the ridges undeveloped and open for all of us who live in the area.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

As a Pittsburg teen, all I want is to see my community thrive, both environmentally and socially. We have so much unutilized land in town. Building in open space and disrupting the ecosystems of animals is not necessary for economic growth. This may seem like a short-term benefit to our community but in the long run, we will see significant environmental destruction as a result of excessive housing development on open land.

Please, take the community into consideration before proceeding with this project. Because we will all have to render the consequences of improper land use.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

Pittsburg City Council,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

City Clerk Alice Evenson,

I'm a homeowner in the Holbrook Heights neighborhood in Concord. The beautiful hills and wildlife to the east of my home are an important part of its beauty.

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

****External Sender: Use caution before opening links or attachments****

City Clerk Alice Evenson,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing as they've done many times before here and in other states. Remember when they sneakily cut down all those oak trees at night and when they were caught, simply said "Oops, we didn't know." The board not approving their request to do it should have been enough. They are bullies and shouldn't even have a contracting license. I live in one of their communities. It's been one scary discovery after another in my house. We set aside at least \$20k every time we have to dig or open a wall in our house because we know there will be a fire hazard, mold, cracked foundation, or structural inadequacies that never would have passed inspections even when the house was originally built.

I see the hilltops from my house and it's our back yard view. Lining the ridge with boxes would be an environmental misstep decreasing home values all over- not only for the view, but also the removal of the open space, and potential traffic congestion.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves a public answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

An increase in housing means a residential increase for the town. We all know it will put stress on the local facilities like water, power, waste water treatment, and schools. There is no public plan in place to increase capacity for any of these facilities before they'll need it. Current and new residents will be negatively impacted by this development as the project currently stands.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan which includes addressing and amending plans with respect to future service demands and "to protect open space and habitat areas". (City of Pittsburg water and wastewater services.)

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills and public utilities protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

City Clerk Alice Evenson,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

City Clerk Alice Evenson,

If this is given into, the open space Marshal Regional Park will at some point be "eaten into." Give developers an "inch" and they will take a mile into the open space. It may seem harmless now but in the future development will creep in as future generations won't know the struggle and ramifications this proposal will/has cause.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

City Clerk Alice Evenson,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Pittsburg City Council,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park.

For environmental reasons as well as the projected major increase in traffic, this proposal should be rejected. Stop building on hillsides. The costs to fire safety, water runoff, plumbing infrastructure is not sustainable regardless of the high prices these undoubtedly larger houses will sell for. Certainly not affordable to average Pittsburg residents.

Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

City Clerk Alice Evenson,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

Removing these hills would ruin our environment and where we live. We need permeable surfaces. The concrete and pavement would contribute to climate change and result in more heat and easy flooding in Pittsburg.

****External Sender: Use caution before opening links or attachments****

City Clerk Alice Evenson,

I have planted trees with some of you, and joined with you in other community events like bike to work day, pedestrian safety projects, etc. I voted for your platforms based on commitments to help our community and find it hard to believe this is how you would go about doing it. I know we have to find housing options but Faria is a problem, not the solution. I recall a Native American concept of making decisions based on how it will affect the next seven generations and I'm asking you if you believe destroying some of the last open space we have is the legacy you want to leave behind.

My Pittsburg High School students and I have been discussing quite a few environmental issues associated with urban sprawl vs. smart growth. Faria, unfortunately, is the former. Many of the issues of Faria are already mentioned in the form letter below like the traffic and carbon output resulting from sprawl contributing to climate change. I'm sure I could write more about how Pittsburg already is being covered with many impermeable surfaces and how they exacerbate flooding issues that come with climate change. In addition, the increase of paved surfaces

absorb heat in a city that already faces high summer temperatures.

I just ask you to consider that this is one of those choices that are almost impossible to take back. One can find developers to convert other spaces that are already in use to allow for housing or build more densely and efficiently. Once you take away the last open space it will be nearly impossible to find financing to dismantle and restore land to pristine conditions. Please consider the big picture and the long term welfare of the people that count on you to make the environmentally, and morally correct choice for their future.

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Pittsburg City Council,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.
