****External Sender. Use caution before opening links or attachments****

Council Members,

Please reconsider the land use proposed in this project. The density of it is out of proportion to the space it would occupy.

While I'm aware of our city's limited vacant space for expansion to increase tax revenues, this project in its current state doesn't present the balance of preserving our most scenic spaces while providing residential housing.

Our fair city deserves better.

Respectfully,

J. Faye Fields

Subject: Faria Project Protest

****External Sender: Use caution before opening links or attachments****

Madame Mayor and Council Members,

Pittsburg is a very diverse city. We are also fortunate to be surrounded by nature's diversity. We have a biodiverse shoreline and beautiful hills. No matter what our background, income level or political interest we are united in our appreciation of our hills and ridge line.

I'm reminding the council of the impact of human encroachment into fragile ecosystems and the value of unaltered nature to human well-being. Please be mindful of the potential impact of wildfires to our hills, climate change, the unpredictability of water supply, and lastly, equally important the negative impact this project will have on wildlife and their habitat.

This Council has the opportunity to be stewards for our local environment and maintain the natural beauty we all love and hold dear while modeling responsible conservation. Please honor the decision of our esteemed Planning Commission

Sincerely,
Patt Young

Subject: Please deny Faria Development

****External Sender. Use caution before opening links or attachments****

To the city council members of the city of Pittsburg,

I cannot physically attend the meeting, but I beg you to deny the Faria Development to build on our hills and do what you can to save our hills. I chose Pittsburg to be my home city since 1993, because of its beautiful hillside. This is what makes Pittsburg the special city we are, for having the hills accessible to the community's citizens for hiking, appreciation of nature and its wildlife. This is a perfect place to have community members learn about preservation by giving them access to our own nature haven. Please allow us to appreciate and care for our environment by preserving it. The city counsel should advocate for preservation of our nature. This is truly essential to the identity of our city.
Enough building houses on our hillside!

Thank you for your continued support,
Angelica Connally

Subject: Save the ridge

****External Sender. Use caution before opening links or attachments****

Pittsburg City Council,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

Pittsburg City Council,

I am strongly against this ridge development. It will not add to the desirability of Pittsburg- In fact just the opposite. It is bad for traffic, bad for wildfire risk, and bad for the environment.

I am a registered democrat and I vote in every election. Your vote on this issue will be the defining factor in the next election.

Thank you,
Sandra Harris

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

The development of more housing, especially on the little natural environment we have left, is counterproductive as we bring more homes and no businesses. Not only does it destroy the environment but it doesn't help any with the current traffic nor revenue that the city could receive by developing more useful projects.

Subject: Save the Ridge Now!

****External Sender. Use caution before opening links or attachments****

City Clerk Alice Evenson,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

Pittsburg City Council,

I beg you to not allow ANY MORE HOUSES to be built in this beautiful place. The environmental impact alone should be enough. But please also consider our peace of mind, the chaos that is already commute hours (even many of us who use Bart have to take our kids to school first) and the lack of good resources.

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Faria cannot be trusted. The Seeno folks have countless business names to confuse residents rather than warn residents of their shoddy practices.

Stop playing Seeno's game—we need our ridges and natural beauty no ticky-takky ugly boxes built with lack of integrity

No Faria or Seeno ever!!

As an active Pittsburg resident that has enjoyed the Bay Area his entire life....I find it atrocious that our Council would even entertain a proposal that would ruin the ridgeline. Contra Costa has done an Amazing job protecting its scenery and open space...Dont be the one stain in the county to allow its hillsides to be uglid and littered for profit. It would also bifurcate the haves and have nots in a town already boiling over. This is bad for Pittsburg! TOM LITAWA

City Clerk Alice Evenson,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments. In addition Seeno has a history of fraudulent business practices and we can be sure this one won't be any different.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do so? Plus, Highway 4 is already clogged up enough without adding more traffic for all these commuters.

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved, move it somewhere else closer to the Bay but do not destroy our beautiful ridge line!

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

Sincerely,
H. Izabelle

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

City Clerk Alice Evenson,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

Faria cannot be trusted. The Seeno folks have countless business names to confuse residents rather than warn residents of their shoddy practices.

Stop playing Seeno's game—we need our ridges and natural beauty no ticky-takky ugly boxes built with lack of integrity

No Faria or Seeno ever!!

Pittsburg City Council,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

As an active Pittsburg resident that has enjoyed the Bay Area his entire life....I find it atrocious that our Council would even entertain a proposal that would ruin the ridgeline. Contra Costa has done an Amazing job protecting its scenery and open space...Dont be the one stain in the county to allow its hillsides to be uglid and littered for profit. It would also bifurcate the haves and have nots in a town already boiling over. This is bad for Pittsburg! TOM LITAWA

Pittsburg City Council,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments. In addition Seeno has a history of fraudulent business practices and we can be sure this one won't be any different.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do so? Plus, Highway 4 is already clogged up enough without adding more traffic for all these commuters.

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved, move it somewhere else closer to the Bay but do not destroy our beautiful ridge line!

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

Sincerely,
H. Izabelle

Pittsburg City Council,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

Pittsburg City Council,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park.

While I support more housing in California, this should be expanded in existing urban areas. Building on open-range lands increases the chance of life-threatening wildfires such as the 2018 Camp Fire that killed 85 people in Butte County. Fire-prone hillsides in a state famous for its yearly droughts, where water supply is limited or non-existent, is the last place for new residences.

This project to provide more housing to California is a waste of money and resources if it is carried out in a high-risk wildfire zone.

City Clerk Alice Evenson,

I beg you to not allow ANY MORE HOUSES to be built in this beautiful place. The environmental impact alone should be enough. But please also consider our peace of mind, the chaos that is already commute hours (even many of us who use Bart have to take our kids to school first) and the lack of good resources.

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

That's not right—the public deserves an answer, especially because the Faria project and its environmental review were so deficient that the project needed to be overturned.

There's still no site plan, just a blob showing where the project would be without any detail. The project's footprint remains unchanged—it's still threatening Thurgood Marshall Regional Park next door and destroying Pittsburg's ridge.

Hundreds of previous comments from Pittsburg residents and agencies such as LAFCO opposing the project have been ignored.

Faria in its current form breaks Pittsburg's own General Plan. Requirements that development in the hills be sensitive to natural terrain are gutted.

Carbon pollution that contributes to disastrous global warming would be a significant and unavoidable impact of this project. Development should be moved off the ridge and closer to existing services to reduce carbon pollution.

Nearly 13,000 daily car trips would be generated by this project. Why does Pittsburg want housing so far away from the city center so that anything and everything requires a car to do?

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

City Clerk Alice Evenson,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park. Open space, habitat for wildlife, and the community's scenic views are incredibly important, and Pittsburg's residents deserve access to nature.

Seeno/Discovery Builders and the City of Pittsburg are trying to jam a bad project through without people knowing.

Even though changes to Faria's environmental review were legally required, the City of Pittsburg and Seeno are trying to rush through a new document that doesn't give the public time to review it and doesn't require a response to comments.

The development of more housing, especially on the little natural environment we have left, is counterproductive as we bring more homes and no businesses. Not only does it destroy the environment but it doesn't help any with the current traffic nor revenue that the city could receive by developing more useful projects.

The Pittsburg City Council needs to do what other communities in the Bay Area have already done: treat their hills as a public good to be protected rather than something to be flattened and paved over.

Please change the project so that the ridge is saved.

Pittsburg residents deserve to have their hills protected, like so many other Bay Area communities already do. And they deserve the same access to Thurgood Marshall Regional Park that Concord residents have.

City Clerk Alice Evenson,

Please protect Pittsburg's hills, the ridge between Pittsburg and Concord, and the neighboring Thurgood Marshall Regional Park.

While I support more housing in California, this should be expanded in existing urban areas. Building on open-range lands increases the chance of life-threatening wildfires such as the 2018 Camp Fire that killed 85 people in Butte County. Fire-prone hillsides in a state famous for its yearly droughts, where water supply is limited or non-existent, is the last place for new residences.

This project to provide more housing to California is a waste of money and resources if it is carried out in a high-risk wildfire zone.

Samantha Gorman
